Reduced storage requirements.

Prevents users from losing data.

Increased server performance.

Simplified backup and restore.

Eliminates mailbox quotas.

Accelerates search capabilities.

Accounts for all users.

Eliminates PST files.

# CLOUD SOLUTIONS

Amazon EC2

Amazon Elastic Compute Cloud (Amazon EC2) provides scalable computing capacity in the Amazon Web Services (AWS) cloud. Using Amazon EC2 eliminates your need to invest in hardware up front, so you can develop and deploy applications faster. You can use Amazon EC2 to launch as many or as few virtual servers as you need, configure security and networking, and manage storage. Amazon EC2 enables you to scale up or down to handle changes in requirements or spikes in popularity, reducing your need to forecast traffic.

Amazon Storage Gateway

AWS Storage Gateway is a service that connects an on-premises software appliance with cloud-based storage to provide seamless and secure integration between your on-premises IT environment and the AWS storage infrastructure in the cloud.

Amazon RDS

AWS Storage Gateway is a service that connects an on-premises software appliance with cloud-based storage to provide seamless and secure integration between your on-premises IT environment and the AWS storage infrastructure in the cloud.

# CLOUD SOLUTIONS

Azure Virtual Machines

Azure Virtual Machines (VM) is one of several types of on-demand, scalable computing resources that Azure offers. Typically, you choose a VM when you need more control over the computing environment than the other choices offer.

Azure Backup

The Azure Backup service provides simple, secure, and cost-effective solutions to back up your data and recover it from the Microsoft Azure cloud.

What can be backed up ?

On-premises - Back up files, folders, system state ,protect on-premises VMs (Hyper-V and VMWare) and other on-premises workloads | Azure VMs | Azure Files shares | SQL Server in Azure VMs |SAP HANA databases in Azure VMs

Azure SQL Database

Azure SQL Database is a general-purpose relational database, provided as a managed service. With it, you can create a highly available and high-performance data storage layer for the applications and solutions in Azure.

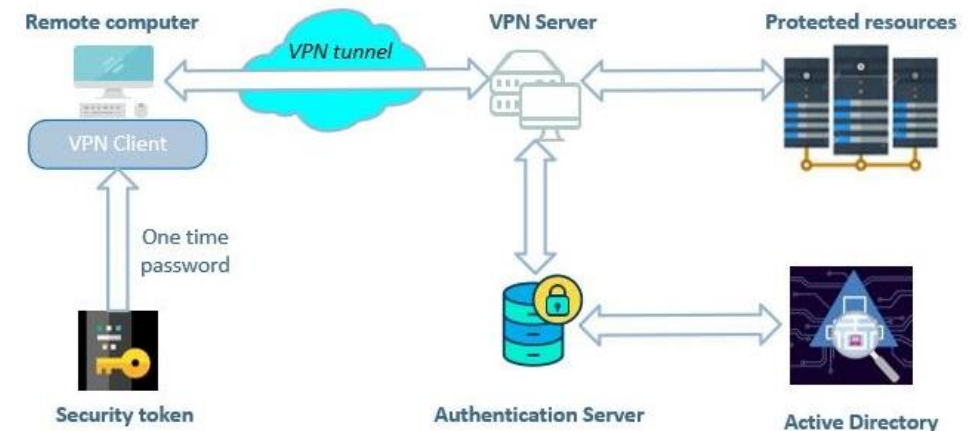

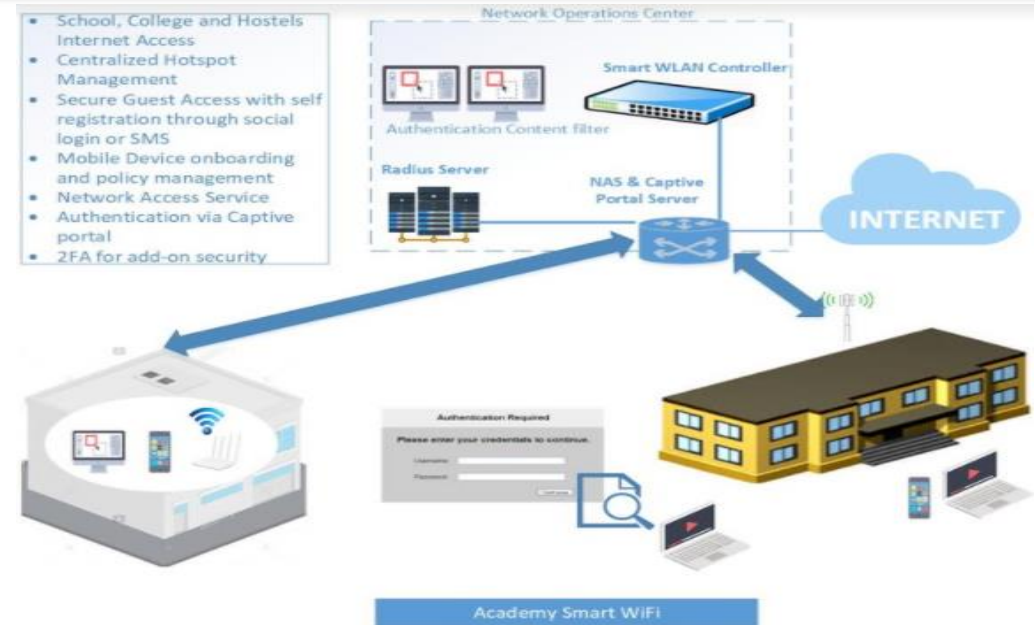

# INFRASTRUCTURE SOLUTIONS

- A. Design, deploy and manage high-performance computing ICT infrastructure with extensive experience and comprehensive, cost-effective and flexible packaged solutions
